THE POWER TO SURPRISE™

KIA Motors' brand slogan "The Power to Surprise™" represents the company's global commitment to surpassing customer expectations through continuous innovation and industry-leading warranties. KIA Motors is an official automotive partner of FIFA – the governing body of the FIFA World Cup – as well as a EUROTOP partner to UEFA. KIA Motors is Korea's oldest car manufacturer, having been founded in 1944, but are now a thoroughly modern operation with over 40 000 employees across our 14 manufacturing plants in eight countries.

THE K2700. VERSATILE ENOUGH TO BE THE PERFECT BUSINESS PARTNER.

Whatever you load onto a K2700, it will get to where you want it to be, quickly and safely. This is why we believe it's one of South Africa's best-selling light commercial vehicles. Every businessman wants reliability, performance, toughness, flexibility, service and support. The K2700 gives you all of it; it's built to carry any load.

FOR WHATEVER YOU HAVE, AND WHATEVER YOU MAY NEED

- You don't need anything more than the usual Code 08 licence to drive a K2700. Everything about the vehicle is designed to make things easier. There's the option of single or double rear wheels. The double rear wheels provide extra toughness, and their 12" diameter means a lower bed and that means easier loading. The single rear wheel option has a 14" diameter (matching the front wheels), which ensures a faster, smoother ride.

TOUGH ON THE OUTSIDE, EASY TO LOVE INSIDE

Your load has all the space it needs, so does your workforce. The cabin has a spacious interior with a three-seat design that provides adequate space for three adults. The driver has good visibility with large windscreen and mirrors to keep passengers and cargo safe. Power steering ensures pleasurable driving and easy parking whilst the foot rest ensures comfort for the driver. The K2700 is all bakkie, but it has been designed to drive like a car. Great visibility, easy to park, stable in the corners (even while loaded), the K2700 is for businesspeople who want to put their efforts into their work, not their driving.

YOU HANDLE MORE THAN ONE THING AT A TIME. HERE'S A BAKKIE THAT CAN KEEP UP.

The K2700 is available in three derivatives, the Chassis Cab, the Workhorse and the Tipper. The Chassis Cab has no load bed, which makes it perfect for customised applications. An example would be a refrigeration unit, which means that this bakkie is a favourite with businesses such as fruit & veg sellers and butcheries. If you require versatility then this is the bakkie for you.

The Workhorse is the standard bakkie with a load bed and drop down sides. It's designed to carry loads up to 1.3 tonnes. If the job involves the big and the heavy the K2700 can handle both. Tools, equipment, cargo - whatever load you need to transport - the K2700 gets the job done.

The Tipper is the standard Workhorse with a reinforced load bed. At some point every load needs to be offloaded. The Tipper is perfect for transporting construction materials like sand, soil and stones, and then putting them exactly where you want them. If you're a landscaper or builder the Tipper is for you.

WHAT EVERY BUSINESSMAN WANTS: PERFORMANCE.

The K2700 has the perfect workhorse engine, a 2.7litre, 4-cylinder, J2 diesel power plant that delivers 62kW of power at 4 150rpm and 168Nm of torque at 2 400rpm. That's enough power to carry any load. The suspension, with wishbone stabiliser in front and rigid axle in the rear, provides firm support for heavy loads, cushioning for rough roads and precision for superior handling. When you get to your destination the braking system with front ventilated discs allows for efficient braking. The Load Sensing Proportioning Valve (LSPV) distributes braking power to the rear depending on the load and therefore makes sure you also stop with certainty and stability.

WARRANTY & MAINTENANCE

By now you'll know that you don't have to worry about flexibility or carrying the load when it comes to the K2700. Well, you also have nothing else to worry about because KIA Motors has given the K2700 a 5-year/150 000km warranty. There's also a 3-year/60 000km service plan. You can concentrate on your business; with your vehicle taken care of, and no nasty surprises or unexpected additions to your budget.
